

# FACT SHEET

## Sewer Replacement Improvement Project at Nevada Avenue and Bodger Street Area

### Project Summary

The City of El Monte will be replacing aging sewer pipeline and manholes on Nevada Avenue and Bodger Street. The 93-year-old pipelines are located in private backyard easements, which are difficult for the City to properly access and maintain. The limited access increases the risk of blockages in the system and sewer spills in the area. Through this project, the City will relocate new sewer pipes in public streets, and reduce risk of sewer system blockages.

### Project Features

- Replace sewer mains in the Nevada Avenue – Bodger Street neighborhood.
- Evaluate old sewer pipes currently in private backyard easements.
- Relocate new sewer pipes to public streets, reducing maintenance costs.

### Community Meeting

The City of El Monte will be hosting three community meetings to provide information on the project and obtain community feedback. The first community meeting will be held on:

**When** **Wednesday, October 18, 2018**  
**7:00 p.m. - 8:00 p.m.**

**Where** **El Monte Community Center**  
**3130 Tyler Avenue, El Monte**
