
NOTICE OF ON-GOING CONSTRUCTION

for

MERCED AVENUE LINEAR PARK & WATER LINE IMPROVEMENT PROJECT, CIP 003

Dear Residents / Business Owners,

The City of El Monte has contracted with KASA Construction, Inc. to construct the project improvements in your neighborhood and work is intended to commence on August 07, 2023, and is anticipated to be complete by May 23, 2024.

This notice is to advise you of the on-going essential road and community development work on Merced Ave, from Garvey Ave to Towneway Dr. A plan of the site and extent of the works is attached for your information.

Working hours will be 7:00 AM to 4:00 PM (Mon – Fri).

The work consists of three categories of work that will be performed in this order:

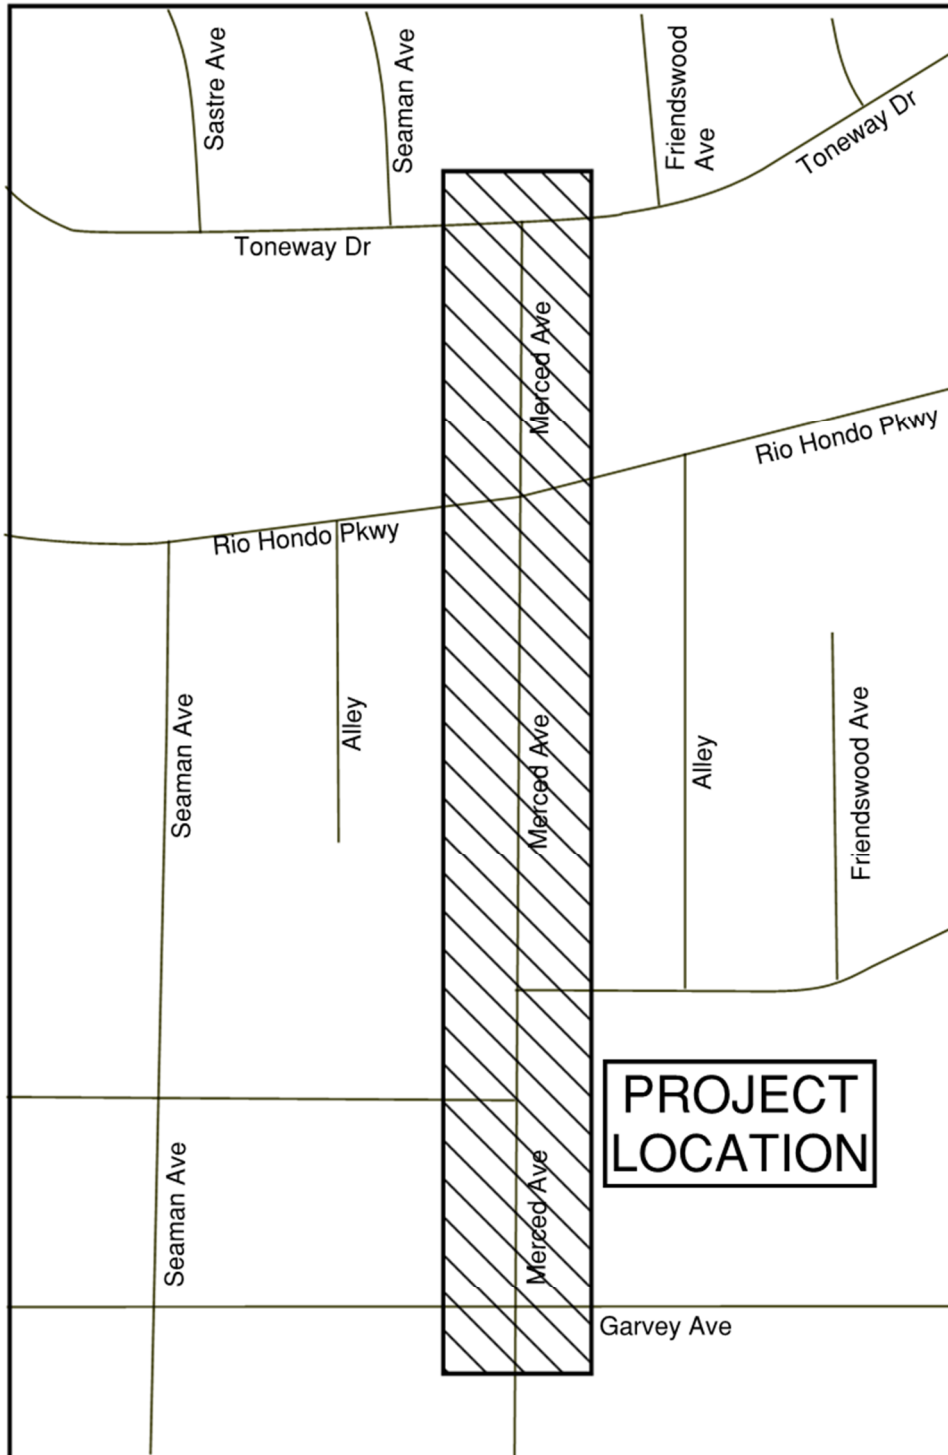

- Waterline Improvements: water main and service replacements between Bodger Street and Rio Hondo Parkway
- Linear Park: Accessible Median Islands with concrete and decomposed granite path, seating areas, solar lighting, landscape & irrigation, planting shrubs and trees along with Bio-filtration basins for rain retention.
- Street Improvements: Asphalt Grind & Overlay, with new striping and signage.

We kindly ask that you please observe and comply with all posted parking restrictions as any vehicles parked in a posted "NO PARKING" area will delay and prolong the construction schedule. We will make every effort to provide ample advanced notice when we anticipate the need for any parking restrictions.

However, please be assured that a single lane in each direction of Merced Avenue will be available for travel throughout the duration of the project.

We understand that this may be a short-term inconvenience and we hope to work together with you in a professional and amicable manner for the long-term improvement and beautification of your neighborhood.

We thank you in advance for your patience and cooperation through construction which will add substantial value to your community. If you have any questions about the project, please feel free to contact Charles Rameh with KASA Construction Inc at 909-457-8260, or Ludy Smeets with Onward Engineering at 714-328-3912.
