

Fact Sheet

Ramona-Badillo Traffic Synchronization and Bus Signal Project CIP 838

Project Description

This Project consists of Traffic signal improvements at 7 signalized intersections along Garvey Avenue and 7 signalized intersections along Durfee Avenue. The improvements consists of new upgraded signal hardware and pedestrian countdown heads. Proposed improvements helps visibility of intersection signals to aid driver's advance perception of the upcoming intersections and minimizes pedestrians and bicyclist collisions by reducing conflict points between vehicles and non-motorists and assure pedestrians sufficient time is provided to cross the street.

Status

Planning/Design

Schedule

Design: Complete Spring 2026

Construction: Begin Fall 2027
